Subject: RE: Data Request from Steve Way - ESAT Data from Red and Bonita

Hi, Don.

I still haven't seen the Red and Bonita data. Is it ready yet, and if so where? I've been checking the UAnimas Scribe and the Red and Bonita Scribe and the R08_GoldKing_combo Scribe and haven't seen it yet. I realize it's still preliminary but any results would be helpful.

Thanks for checking.

Jan

We heard about that last night. There are two projects from Red and Bonita on our backlog so we started both of them. So far, we have analyzed all of the dissolved samples and the TR's will go on the instrument as soon as the ER samples from last night are complete. So, all the Red and Bonita data should be in SCRIBE by EOD today.

ESAT-please move the Red and Bonita Mine samples (A-087) to the top of the priority list following the Upper Animas samples you received last night.

Thanks, Don

Scott: please fold this samples in with the samples you are running at the lab tonight. START with the ones arriving, the field team will point out their priorities when they arrive.

Martin,

Steve Way had us collect samples at Red and Bonita prior to initiating water treatment this year and again during treatment to determine the effectiveness of treatment.

- The sample collected during treatment was submitted to an independent lab during late July and we have the results.
- The samples collected prior to treatment were submitted to ESAT under TDF A-087 but we don't have results. The Sample ID is CC03D and samples were submitted on June 26 and July 20 (approximate). The results would be very helpful to Steve and others in R8 and R6 for their water treatment discussions. Are you the one to request that these samples be expedited from ESAT or should we talk with someone else?
